

SUBHAN AHMED

Software Engineer (.NET)

Lahore, Pakistan | +923009717825 | subhan.ahmd@tuta.io

Ln@subhan-ahmd | github@subhan-ahmd | portfolio@subhan-ahmd.github.io

Software engineer with production experience in C# and ASP.NET Core, building backend systems and enterprise tooling. Primary background in mobile (Flutter), bringing a product-minded approach to backend development with strong API design and database skills.

WORK EXPERIENCE

Software Engineer

Jan 2025 - Present

Orbilon Technologies, Lahore, Pakistan

- Maintained and enhanced multiple production systems including mobile apps, full stack platforms, and business automation integrations across Monday.com, Sitelink, and Aircall.
- Led technical migration of AI Planner from Claude to OpenAI APIs with GPT-4 structured outputs and parallel function calling, achieving 50%+ latency reduction through optimized state management.
- Building full stack Sales Quotation System (React, ASP.NET Core, SQL Server) integrating three external APIs (Enapps ERP, KREO AI, WooCommerce) with rule based pricing engine and audit logging.

Mobile Application Developer

Apr 2024 - Dec 2024

AdSurge AI, Remote

- Developed and launched three cross platform Flutter apps (Side Hustle, AcademIQ, Diecarz) from concept to production, spanning gamified rewards, AI education, and social collection platforms.
- Architected secure authentication systems (Apple/Google Sign-In), AI conversational features with ChatGPT/Gemini APIs, and analytics integrations (Mixpanel, AppsFlyer, Adjust) across all products.
- Delivered scalable Firebase architectures with offline first support (Isar DB), responsive UI, and clean state management (Riverpod) while collaborating in remote agile sprints.

PROJECTS

Sales Quotation Management System, React & ASP.NET

Jan 2026 - Present

- Building a full stack B2B quoting platform (React, TypeScript, ASP.NET Core 8, SQL Server) enabling 20+ concurrent users to generate quotes with automated pricing and PDF output.
- Integrating three external systems (Enapps ERP, KREO AI, WooCommerce) with rule based pricing engine processing 20+ underfloor heating configurations.
- Implemented JWT authentication, role based access control, and audit logging.

Caregiver Management App, Flutter

Jan 2025 - Mar 2025

- Added task management with recurring schedules, media attachments, and 9 language localization (including RTL).
- Extended push notification system with deep linking and FCM token lifecycle fixes.
- Resolved critical bugs in Firebase sync and authentication, improving user retention by 30%.

AcademIQ , Flutter

Apr 2024 - Jul 2024

- Built a multi modal AI education app with 20+ learning modes and seamless LLM migration (ChatGPT Gemini).
- Designed a multi input pipeline integrating OCR, speech-to-text, PDF extraction, and vision AI.
- Developed offline first architecture using Isar DB with Riverpod for persistent sessions.

Quick Care, Flutter

Jan 2024 - May 2024

- Developed a multi role healthcare platform (Patient/Doctor/Admin) with Flutter and Firebase for appointment booking.

- Integrated Paymob payment gateway, MailerSend SMTP for notifications, and location based doctor discovery.
- Integrated AI chatbot using GPT-3.5-turbo API and secure document storage.

EDUCATION

B.S. in Computer Science

Khwaja Fareed University of Engineering & Information Technology, Rahim Yar Khan

Aug 2020 - Jun 2024

CGPA: 3.53/4.00

SKILLS

Technical

C# | ASP.NET Core | SQL Server | PostgreSQL | REST APIs | SOAP APIs | Dart | Flutter | C++ | TypeScript | React | Python | JavaScript | Node.js | Firebase | WebSockets | OpenAI APIs | Claude APIs | Git | GitHub Actions | CI/CD | Linux | FCM

Soft

Problem Solving | Automation Focused | Self Directed Learning | Technical Documentation
